

Create white bitmap android

I'm not robot!

Create bitmap android. Create bitmap with white background android. Create transparent bitmap android.

```
add White Border to Bitmap Demo Code //package com.java2s; import android.graphics.Bitmap; import android.graphics.Canvas; import android.graphics.Color; public class Main { public static Bitmap addWhiteBorder(Bitmap bmp, int borderSize) { Bitmap bmpWithBorder = Bitmap.createBitmap(bmp.getWidth() + borderSize * 2, bmp.getHeight() + borderSize * 2, bmp.getConfig()); //from w w j a v a 2s.c o m/ Canvas canvas = new Canvas(bmpWithBorder); canvas.drawColor(Color.WHITE); canvas.drawBitmap(bmp, borderSize, borderSize, null); return bmpWithBorder; } } Related Tutorials @Override @NonNull public Bitmap get(int width, int height, Bitmap.Config config) { Bitmap result = getDirtyOrNull(width, height, config); if (result != null) { // Bitmaps in the pool contain random data that in some cases must be cleared for an image // to be rendered correctly, we shouldn't force all consumers to independently erase the // contents individually, so we do so here. See issue #131. result.eraseColor(Color.TRANSPARENT); } else { result = createBitmap(width, height, config); } return result; } origin: stackoverflow.comorigin: binloter/GuideView@Override protected void onDraw(Canvas canvas) { super.onDraw(canvas); mEraserBitmap.eraseColor(Color.TRANSPARENT); mEraserCanvas.drawColor(mFillingPaint.getColor()); if (mOverlayTarget) { switch (mStyle) { case Component.ROUNDRECT: mEraserCanvas.drawRoundRect(mTargetRect, mCorner, mCorner, mEraser); break; case Component.CIRCLE: mEraserCanvas.drawCircle(mTargetRect.centerX(), mTargetRect.centerY(), mTargetRect.width() / 2, mEraser); break; default: mEraserCanvas.drawRoundRect(mTargetRect, mCorner, mCorner, mEraser); break; } canvas.drawBitmap(mEraserBitmap, 0, 0, null); } } origin: stackoverflow.com public BitmapDrawable rotateDrawable(float angle) { Bitmap arrowBitmap = BitmapFactory.decodeResource(context.getResources(), R.drawable.map_pin); // Create blank bitmap of equal size Bitmap canvasBitmap = arrowBitmap.copy(Bitmap.Config.ARGB_8888, true); canvasBitmap.eraseColor(0x00000000); // Create canvas Canvas canvas = new Canvas(canvasBitmap); // Create rotation matrix Matrix rotateMatrix = new Matrix(); rotateMatrix.setRotate(angle, canvas.getWidth()/2, canvas.getHeight()/2); // Draw bitmap onto canvas using matrix canvas.drawBitmap(arrowBitmap, rotateMatrix, null); return new BitmapDrawable(canvasBitmap); } origin: PhilJay/MPAndroidChart@Override public void drawData(Canvas c) { int width = (int) mViewPortHandler.getChartWidth(); int height = (int) mViewPortHandler.getChartHeight(); Bitmap drawBitmap = mDrawBitmap == null ? The problem is that the image appears to have a transparent background; this causes some of the black text on the image to disappear against the black background. If I set the ImageView background to white, that sort of works, but I get ugly big borders on the image where it is stretched to fit the parent (the actual image is scaled in the middle). So - I want to convert the transparent pixels in the Bitmap to a solid colour - but I cannot figure out how to do it! Any help would be appreciated! Thanks Chris If you are including the image as a resource, it is easiest to just edit the image yourself in a program like gimp. You can add your background there, and be sure of what it is going to look like and don't have use to processing power modifying the image each time it is loaded. If you do not have control over the image yourself, you can modify it by doing something like, assuming your Bitmap is called image. Bitmap imageWithBG = Bitmap.createBitmap(image.getWidth(), image.getHeight(), image.getConfig()); // Create another image the same size imageWithBG.eraseColor(Color.WHITE); // set its background to white, or whatever color you want Canvas canvas = new Canvas(imageWithBG); // create a canvas to draw on the new image canvas.drawBitmap(image, 0f, 0f, null); // draw old image on the background image.recycle(); // clear out old image You can loop through each pixel and check if it is transparent. Something like this. (Untested) Bitmap b = ...; for(int x = 0;
